

**PEDIATRIC
NEUROTRANSMITTER
DISORDERS:
WHAT THEY ARE AND
WHY THEY ARE SO
CHALLENGING TO
DIAGNOSE**

YOU ARE INVITED!

Join us for a webinar to learn about a group of genetic disorders that affect the synthesis of neurotransmitters. We will explore the overlapping signs and symptoms of these disorders and how best to differentiate between them.

WEBINAR:

PEDIATRIC NEUROTRANSMITTER DISORDERS

This brief, case-based webinar followed by a live Q&A aims to provide all the information necessary for health care providers to identify the clinical and biochemical clues for diagnosing rare pediatric neurotransmitter disorders that share overlapping clinical features with each other and other neurological conditions, such as cerebral palsy, which may result in delayed diagnosis.

Presenters

Paldeep Atwal,
MD, MBA, FACMG,
FRCP (UK), FRCP (Glasg)

Clinical and Biochemical Geneticist
Director

Atwal Clinic: Genomic and
Personalized Medicine

Medical Director, Genetic Services
PWNHealth LLC

Keith A. Coffman,
MD

Director, Movement Disorders Clinic
Director, Tourette Syndrome Center
of Excellence

Director, Deep Brain Stimulator
Program

Associate Professor of Pediatrics,
University of Missouri-Kansas City

Associate Professor of Pediatrics,
University of Kansas School of
Medicine

Space is limited. Register
